- In reality, it takes **17.5 weeks** to accomplish all these goals. Under this ISP, in total, one must accomplish **all 17.5-week goals within 12 weeks**.
- Even though this is the unrealistic ISP, I significantly and seriously respect my commitments under the individual study plan and keep making more progress.

1DL451 course goal, and thesis title in my ISP

- **Applied logic course:** The number of exercises in all 4 chapters is numerous, 95 sub-exercises in total. I asked Justin about the number of exercises to finish in the first place before I agree on anything, Justin promised that I just do some representative exercises in each chapter. Later, for each chapter, Justin asked me to solve 90% (e.g., solve 29/32 exercises in Chapter 1) of exercises except few exercises marking with (*), which means challenging exercises.
